SUMMARY

Staff Backend Engineer with 9+ years of experience architecting resilient, distributed financial infrastructure and high-throughput microservices handling \$40M+ in monthly transaction volume. Technical leader with proven experience managing backend teams, operating cloud-native systems (AWS EKS, Kafka, Kubernetes), and engineering fault-tolerant data streaming pipelines for 35k+ active merchants.

TECHNICAL SKILLS

Cloud & Infrastructure : AWS (EC2, EKS), Kubernetes, Docker, Terraform, CI/CD Pipelines, Linux Node Administration

Distributed Systems & Data : Microservices Architecture, Event-Driven Streaming (Kafka, Faust), Redis, PostgreSQL, ETL Pipelines, RESTful APIs

Languages : Python, Node.js, JavaScript, Ruby on Rails, SQL

Frameworks & Libraries : FastAPI, Faust, NestJS, Django, Truffle

Security & Cryptography : Multi-Signature Systems, HSM (Thales nShield Connect), Cryptographic Protocol Design

EXPERIENCE

SpotOn

Oct. 2025 – Present

Lead Software Engineer

Bengaluru, India

- Architected core micro-finance payment engines handling **\$40M+ in monthly processing volume** for **10k+ merchants** on SpotOn Lite and **25k+ merchants** on SpotOn Capital.
- Designed real-time automated net-settlement processing infrastructure calculating variable daily revenue-share payouts.
- Consolidated multi-processor payment streams into unified high-availability accounting ledgers deployed on AWS EKS using Terraform.
- Directly mentor a team of 4 backend engineers, directing architectural reviews, system design practices, and CI/CD quality standards.

SpotOn

Mar. 2021 – Sept. 2025

Software Engineer

Bengaluru, India

- Engineered fault-tolerant POS payment microservices in FastAPI, Faust, Kafka, and NestJS, maintaining strict uptime SLAs.
- Built scalable PostgreSQL analytics ETL pipelines streaming daily, weekly, and monthly financial summaries for 35k+ merchants.
- Refactored legacy backend monoliths into Dockerized Kubernetes services on AWS, eliminating single points of failure.

Propine

2020 – 2022

Senior Software Engineer

Remote

- Architected institutional-grade asset custody platform securing **\$10M+ in assets under custody** via enterprise REST APIs.
- Designed a unified multi-protocol abstraction layer for asynchronous transaction handling with automated exponential backoff retries.
- Maintained core Ruby on Rails backend services while driving technical documentation and team knowledge-sharing sessions.

Self-Employed

2020

Consulting Engineer / Contractor

Remote

- Authored **TZIP-24**, establishing an open protocol specification for delegated, gasless execution in distributed networks.

- Engineered Node.js backend middleware for gasless transaction execution and custom Dune Analytics data models for DHedge DeFi.

Onsa

Nov. 2018 – May 2020

Backend Engineer

Bengaluru, India

- Built asynchronous microservices and RESTful APIs managing multi-signature digital asset wallets across high-concurrency environments.
- Integrated Hardware Security Modules (Thales nShield Connect HSM) to execute high-assurance cryptographic key signing operations.
- Provisioned resilient node networks across mainnet and testnet environments with automated telemetry and health monitoring.

Zeonlab

Jun. 2017 – Nov. 2018

Backend Engineer

Bengaluru, India

- Engineered Django REST APIs connecting enterprise trade finance systems (letters of credit, purchase orders) to immutable ledgers.
- Developed provable digital verification platforms for academic and professional credential tracking.

ACCOMPLISHMENTS

Paradigm CTF – Rank 28 Globally

Feb. 2021

- Placed 28th worldwide competing solo (Team Goldenn) in advanced system security, protocol exploitation, and algorithmic challenges.

Protocol Standardization (TZIP-24)

2020

- Authored the official ecosystem specification for meta-transactions on Tezos, adopted ecosystem-wide for delegated executions.

Coinlist Hackathon Winner (\$5,000 Prize)

Jul. 2020

- Engineered the high-throughput backend architecture for a decentralized auction framework.

Open Source Core Contributions

Various

- Contributed core features and bug fixes to widely used open-source libraries including **web3.js**, **bitcore**, and **conseiljs**.

Hackathon Recognition (Chainlink & Proffer)

2017 – 2020

- Built decentralized prediction market systems integrating Chainlink price oracle feeds; Named Finalist at Proffer Hackathon.

EDUCATION

IIT Kharagpur

2012 – 2017

BTech + Integrated MTech in Chemical Engineering

Kharagpur, West Bengal
